Sky and TELESCOPE

INDEX to Volume XXXI

January to June, 1966

Titles

Airborne Eclipse Expedition, An, *Wallace P. Boquist*, 282
American Astronomers Report —
Distance of Tycho's Supernova, 344
Expansion of Supernova Remnants, 209
Faint Blue Objects, 345
Gravitational Lenses and Radiation Spikes, 142
Infrared Sky Scanning from a Rocket, 208
Interplanetary Radio Scintillation, 142
Measuring Stellar Scintillation from an Aircraft, 345
Motions in the Galaxy M77, 143
Multiple System in Draco? 345
Radio Observations of Uranus and Neptune, 346
Silicon Absorption Effects in the Solar Ultraviolet, 208
Spectra of Quasars, 344
Temperature Anomaly of Mercury, A, 143
Visual Binary in Ophiuchus, 143
American Pioneer in Photoelectric Astronomy, *A. E. Whitford*, 268
Astronomy on the Moon, 3
China's Purple Mountain Observatory, *Chi Yu-ching*, 266
Domeless Solar Refractor of Capri Observatory, The, *K. O. Kiepenheuer*, 256
Double Star Sirius, The, *Sarah Lee Lippincott* and *Michael D. Worth*, 4
Edgewise Presentation of Saturn's Rings, The, *Joel W. Goodman*, September, 1965, correction to, 19
Events of 1966 in the Graphic Time Table, 33
Ex-Variable Star? An, 323
Fan Mountain Station of McCormick Observatory, The, *D. Scott Birney*, 210
Finest Deep-Sky Objects — II, The, *James Mullaney* and *Wallace McCall*, December, 1965, correction to, 90; III, 13
First Observations at Short Wavelengths With the 140-foot Radio Telescope, *J. W. M. Baars* and *P. G. Mezger*, 7
Flights of Gemini 6 and 7, The, *Raymond N. Watts, Jr.*, 80
Ford Observatory in California, *Thomas A. Cragg*, 138
Gemini Docking in Space, *Raymond N. Watts, Jr.*, 274
Graphical Device for Converting Coordinates, A, *Lee Heflinger*, 92
Great Comet of 1965, The, *Brian G. Marsden*, December, 1965, correction to, 90
Great Lakes Fireball, 78
Hertzsprung-Russell Diagram Today, The, *Margherita Hack*, I, 260; II, 333
Hot Spots on the Moon, *John M. Saari* and *Richard W. Shorthill*, 327
International Activity in Space, *Raymond N. Watts, Jr.*, 203
Interstellar Hydroxyl Radio Emission, The, *Nannielou H. Dieter, Harold Weaver*, and *David R. W. Williams*, 132
James Croll and Solar Evolution, *Neville J. Woolf*, 150
Luna 9's Double Success, 131
Lunar Questions Discussed at Pasadena, *John A. O'Keefe*, 10
Measuring the Shape of the Moon, *Robert L. Wildey*, 147
Michigan Stellar Spectroscopist, *K. O. Wright*, 91
Moon-Blink Observation, A, 137
NASA Cutback, The, 71
NASA's Giant Boosters, *Raymond N. Watts, Jr.*, 27; correction, 153
New Giant Tracking Antenna at Goldstone, 342
New Harvard Director, 195
"New Skies for a New City," *Donald D. Davis*, 196
Observational Aspects of Cosmology, *Louis C. Green*, 199
Peculiar *A* Stars, The, *Louis C. Green*, 84
Photographs of Comet Ikeya-Seki — I, December, 1965, corrections to, 90; II, 20
Pioneer 6 Orbits the Sun, *Raymond N. Watts, Jr.*, 152
Prominences at Last May's Eclipse, *Wallace P. Boquist*, 6
Roster of Current Space Activity, A, *Raymond N. Watts, Jr.*, 28
Scope of Astrophysics Today, The, 272
Sodium D Lines in Comet Ikeya-Seki, The, *W. Livingston, F. Roddier, H. Spinrad, C. Slaughter*, and *D. Chapman*, 24
Soft Landing on Mars, *Raymond N. Watts, Jr.*, 346
Some Facets of Astronomy in the U. S. S. R., 270
Space Research Plans, 255
Spectrum of 10 Lacertae, 337
Splendid April 25th Fireball, 324
Synchronization in Close Binaries, *Su-Shu Huang*, 215
This Year's Eclipses of the Sun, 17
Three Offshoots of Astronomy, *E. D. Dale*, 277
Washington 6-inch Transit Circle, The, *Paul D. Hemenway*, 72
Yale's Pathfinder of Moons, Planets and Stars, *Joseph Ashbrook*, 146

Authors

Abetti, Giorgio, and *Margherita Hack*, letter, 269
Argyle, Edward, letter, 207
Ashbrook, Joseph, Astronomical Scrapbook, 79, 218, 340
book review, 40
Yale's Pathfinder of Moons, Planets and Stars, 146
Ashbrook, Joseph, and *Leif J. Robinson*, book review, 103
Baars, J. W. M., and *P. G. Mezger*, First Observations at Short Wavelengths With the 140-foot Radio Telescope, 7
Bell, Barbara, book review, 293
Berendzen, Richard E., book review, 97
Birney, D. Scott, The Fan Mountain Station of McCormick Observatory, 210
Bok, Bart J., book review, 357
Boquist, Wallace P., Airborne Eclipse Expedition, An, 282
Prominences at Last May's Eclipse, 6
Botley, Cicely M., and *A. Dauvillier*, letter, 207
Brasch, Klaus R., book review, 223
Bridges, James F., Moon Movies in Color, 312
Burgess, Eric, letter, 30
Busler, William J., How To Find It: Messier 94, 181; Messier 92, 379
C. A. F., see *Federer, Charles A., Jr.*
Chapman, Clark R., book review, 37
Chapman, D., see *Livingston, W.*
Cheung, C., see *Chung, D. S.*
Chi Yu-ching, China's Purple Mountain Observatory, 266
Chung, D. S., and *C. Cheung*, Student Observers Active in Hong Kong, 83
Clarke, Urana, An Amateur Astronomy Group in Montana, 206
Collier, Charles, A Junior's Inexpensive Clock Drive, 236
Cox, Robert E., conductor, Gleanings for ATM's, 44, 106, 170, 231, 300, 366
Diffraction-Limited Schmidt-Cassegrain Telescope, A, 231
Giant Binocular of Off-Axis Gregorian Design, A, 106
Notes on Newtonian Reflector Alignment, 170
Cragg, Thomas A., Ford Observatory in California, 138
Cross, Eugene W., Jr., letter, 339
Czuia, Klaus, Observations of CY Aquarii, 116
Dale, E. D., Three Offshoots of Astronomy, 277
Dauvillier, A., see *Botley, Cicely M.*
Davis, Donald D., "New Skies for a New City," 196
Delano, Kenneth J., The Convex Floor of the Crater Mersenius, 309
DiBartolomeo, Dennis, Amateur Observers Society, 349
Dieke, Sally H., book review, 163
Dieter, Nannielou H., Harold Weaver, and *David R. W. Williams*, The Interstellar Hydroxyl Radio Emission, 132
Douglas, Jane, New York Amateurs Aid World Science Center, 154
Dunham, David W., Occultation Highlights — March-May, 1966, 186; June-September, 1966, 382
Epstein, L. C., letters, 30, 339
Farone, William A., letter, 207
Federer, Charles A., Jr., Rambling Through . . . (current month) Skies, 64, 124, 188, 248, 316, 384
Galan, Charles F., A Simple Pipe-Mounted 6-inch Reflector, 304
Gale, S. I., book review, 295
Gizinski, Ralph, New Variable Star Observatory in Germany, 349
Glenn, William H., Meteors, 60, 246, 314
Sun, Moon, and Planets This Month, The, 63, 123, 187, 247, 315, 383
Goodman, Joel W., The Edgewise Presentation of Saturn's Rings, September, 1965, correction to, 19
Green, Louis C., Observational Aspects of Cosmology, 199
Peculiar *A* Stars, The, 24
Hack, Margherita, The Hertzsprung-Russell Diagram Today — I, 260; II, 333

Departments and Features

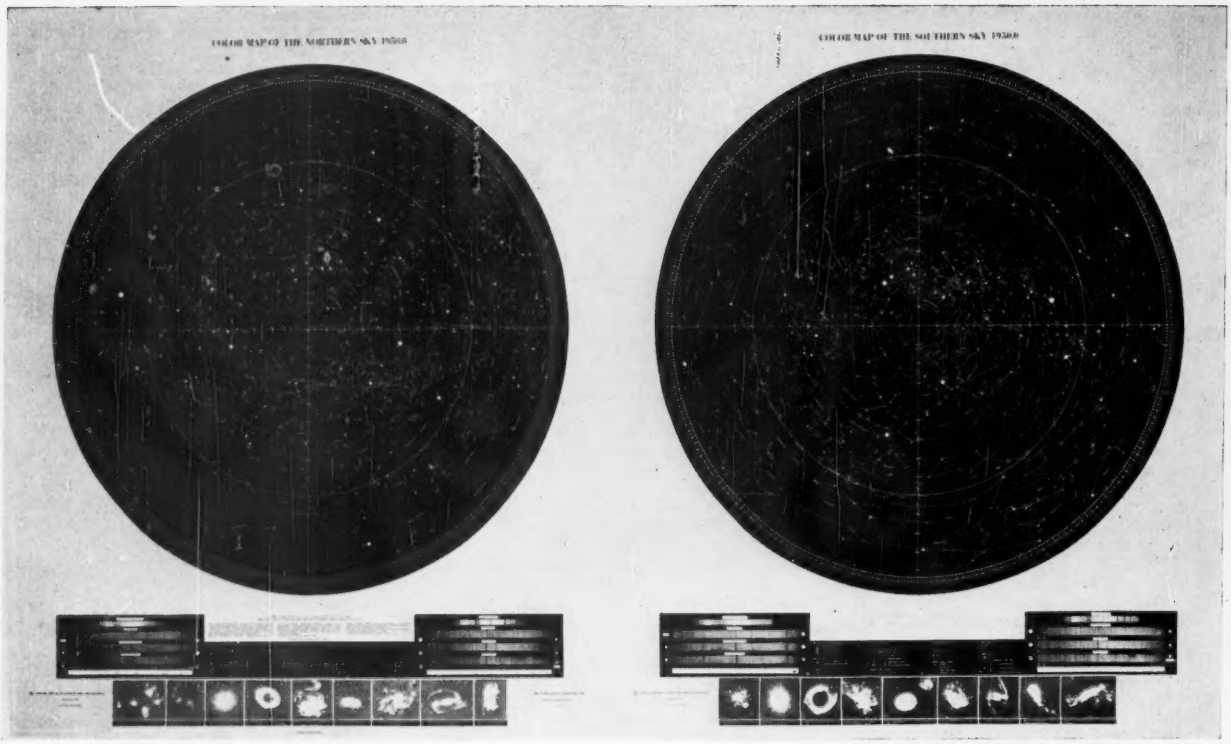
Amateur Astronomers—
AAVSO Fall Meeting Held at Harvard Observatory, December, 1965, correction to, 90
Activities of Grazing Occultation Observers, 280
Amateur Astronomy Group in Montana, An, 206
Amateur Briefs, 31, 83, 154, 206, 281, 350
Amateur Meetings During Coming Months, 281
Amateur Observers Society, 349
Amateur's Collection of Old Refractors, An, 31
Amateur's Reminiscences, An, 206
Italian Amateur, 350
Margaret Back Mazer Dies, 206
Middle East Region, 350
New Variable Star Observatory in Germany, 349
New York Amateurs Aid World Science Center, 154
1966 ALPO Convention, 154
Philipp Fauth Anniversary, 267
Planetarium Listing, 350
Student Observers Active in Hong Kong, 83
Texas Amateur's Rotating Observatory, 31
Astronomical Scrapbook—
Father Perry's Expedition to Kerguelen Island, 340
Pulkovo Double Stars and J. H. Mädler, The, 79
Roger Bacon and the Voynich Manuscript, 218
Books and the Sky—
Advances in Astronomy and Astrophysics, Vol. 3, Zdenek Kopal, editor, 292
All About Light and Radiation, Ira M. Freeman, 295
Annual Review of Astronomy and Astrophysics, Vol. 3, Leo Goldberg, editor, 225
Astronomy, University of Illinois Elementary-School Science Project, 38
Celestial Handbook, Robert Burnham, Jr., 362
Chemistry and Beyond, Herbert Dingle, G. R. Martin, and Eva Paneth, editors, 163
Galactic Structure, Adriaan Blaauw and Maarten Schmidt, editors, 357
Introduction to Space Science, Wilmot N. Hess, editor, 293
Introduction to the Atmosphere, Herbert Riehl, 166
Lighthouse of the Skies, Bessie Zaban Jones, 97
Neighbors of the Earth, Thornton Page and Lou Williams Page, editors, 163
Planet Uranus, The, A. F. O'D. Alexander, 103
Satellites of the Solar System, Werner Sandner, 223
Sky at Night, The, Patrick Moore, 40
Sky Rangers, Eloise Engle and Kenneth H. Drummond, 228
Solar Radio Astronomy, Mukul R. Kundu, 222
Sourcebook on the Space Sciences, Samuel Glasstone, 37
Starlight Nights, Leslie C. Peltier, 96
Stellar Structure, Lawrence H. Aller and Dean B. McLaughlin, editors, 290
Sun in Art, The, Walter Herdeg, editor, 101
Telescopes for Skygazing, Henry E. Paul, 100
Weather Eyes in the Sky, J. Gordon Vaeth, 39
Celestial Calendar—
Bright Variable in Hercules, A, 246
83 Ursae Majoris: A Suspected Variable, 122
Jupiter's Satellites, 63, 123, 187, 247, 315
Meteors, 60, 246, 314
Minima of Algol, 62, 124, 185, 246, 313, 381
Moon Phases and Distances, 62, 122, 185, 247, 314, 381
Notes on Two Minor Planets, 122
Occultation Highlights—March-May, 1966, 186; June-September, 1966, 382
Occultation of Alpha Librae, An, 313
R Lyncis: A Mira-Type Variable Star, 62
RU Camelopardalis, 381
S Canis Minoris: An Orange Variable Star, 185
Sun, Moon, and Planets This Month, The, 63, 123, 187, 247, 315, 383
Two Eclipses in May, 314
Uranus and Neptune in 1966, 62
Variable Star Maxima, 62, 122, 185, 246, 313, 381
Variable Star Near the Head of Draco, A, 314
Vesta Reminder, A, 60
Feature pictures—
Lunar crater Gassendi, 160
Moon's south-central highlands, 286
Front-cover photographs—
Ford Observatory on Mount Peltier, 129
Montreal's Dow Planetarium, 193
Naval Observatory 6-inch Transit Circle, 69
Solar Telescope on Capri, 253
Solid-Fuel Booster Test in Florida, 1
Three Views of the April 25th Fireball, 321
Gleanings for ATM's—
"Design of Small Reflecting Telescopes, The," 110
Diffraction-Limited Schmidt-Cassegrain Telescope, A, 231

Giant Binocular of Off-Axis Gregorian Design, A, 106
Junior's Inexpensive Clock Drive, A, 236
Mounting a 12½-inch Long-Focus Mirror, 300
Notes on Newtonian Reflector Alignment, 170
Observatory Over a Peaked Roof, An, 176
One-Man 25-Year Observatory Project, A, 44
Oregon Amateurs' Simple Equipment for Astrophotography, 366
Simple Pipe-Mounted 6-inch Reflector, A, 304
In Focus, 137, 276
In the Current Journals, 26, 89, 144, 213, 264, 338
Letters, 30, 95, 155, 207, 269, 339
New Books Received, 41, 104, 168, 229, 297, 364
News Notes—
AAS Meeting, 144
ASP Meeting, 337
Allegheny Observatory Gets Help, 145
Antimatter May Matter, 264
Are Quasars Truly Remote? 338
Aurora Expert, 90
Catalogue of Stellar Spectra, 26
Catalogue of 258,997 Stars, 337
Cepheids of the Andromeda Galaxy, 26
Cloud Satellites Reobserved, 265
Color of the Sun, 213
Current Status of Rainmaking, 214
Death of F. G. Houtermans, 214
"Dial-a-Satellite" Expanded, 214
Earth's Size, 25
Effect of the Planetary System on Comet Orbits, 25
From Here and There, 145, 338
Gamma Ray Source in Cygnus, 339
Harlow Shapley's Birthday Reprints Available, 337
How Old Is Mars' Surface? 89
Is There Life on Earth? 213
Mass of the Atmosphere, 338
Miami Summer Course, 212
Michigan Astronomer Dies, 26
NASA Solar Flare Patrol, 265
New Computation of Moon's Orbit, 25
New Southern Telescope, 19
New Telescopes in China, 26
Nova Herculis 1963 Before Its Outburst, 214
Observable Gravitational Lens Effect? An, 145
Observations of Zodiacal Light and Gegenschein from a Spacecraft, 144
Optical Figuring with an Ion Beam, 89
Orientations of Eclipsing Binary Orbits, 213
Origin of U Geminorum Stars, 265
Otto Struve Reflector, 259
Potassium Flare, 264
"Radio Science," 214
Rotation of Mercury, 213
Seminar at Madison, 212
Smithsonian Plans New Observatory, 338
South Carolina Amateur, 214
Space Leader Dies, 26
Spectrum of 2 Andromedae, 264
Toronto's McLaughlin Planetarium, 90
Tracks of Charged Particles in Meteorites, 144
21-Centimeter Line in NGC 5668, 90
Two Large Optical Telescopes, 279
Unusual Binary, 338
Variations in Regional Interstellar Absorption, 90
WWV To Move, 26
Yerkes Librarian, 338
Observer's Page—
Convex Floor of the Crater Mersenius, The, 309
Deep-Sky Wonders, 60, 118, 183, 310, 378
Deep-Sky Wonders—The Messier Catalogue, 239
Finding the Combined Magnitude of a Double Star, 180
How To Find It: Messier 94, 181; Messier 92, 379
Many Leonids Observed, 58
Mars, Saturn, and the Moon, 308
Mercury Setting, 375
Moon Movies in Color, 312
New Naked-Eye Variable, 307
News from Occultation Observers, December, 1965, correction to, 90
News of Meteor Showers, 184
Notes on the Lyrid Meteor Shower, 380
Observations of CY Aquarii, December, 1965, correction to, 116; 116
Observations of Echo 1 and 2 in Eclipse, 117
Observations of the Double Nucleus in Comet Ikeya-Seki, 376
Observations of the Phase of Venus, 179
Observations of Three Meteor Showers, 112
Observing Plans for Two Grazing Occultations, 182
Observing the Moon, Beer and Feuillée, 58; Bessarion B, 245
Photograph of December's Penumbral Eclipse, 182
Photographing the Gegenschein, 380
Pilot's Experience, A, 116
Recent Sunspot Activity, 311
Reports of Comet Ikeya-Seki (1965f), 52
Saturn: A 1966 Spectacle, 374
Some Hints for Observing the Sun, 241
Some Magnitude Standards, 308
Spiral Lunar Craters, 377
Sunrise on Ptolemaeus, 119
Sunspot Numbers, 59, 117, 184, 244, 311, 375
Unusual Photograph, An, 244
Unusual Widespread Colors on Jupiter, 306
Venus-Mars-Moon Spectacle in October, The, 57
Vesta Reminder, A, 60
Questions from the S + T Mailbag, 16, 90, 141, 207, 271, 350
Rambling Through . . . (current month) Skies, 64, 124, 188, 248, 316, 384
Some Astronomical Anniversaries, December, 1965, correction to, 10
Southern Stars, 126, 250, 386
Stars for . . . (current month), 65, 125, 189, 249, 317, 385

Selected Topics and Celestial Objects

This listing is not intended to be exhaustive, and does not supplant the other parts of the index. For example, material in such regular features as Amateur Astronomers is ordinarily indexed only under the Departments and Features section.

Amateur astronomers: equipment, 30; Hong Kong, 83; international, 269; Livingston, Mont., 206; New York, N. Y., 154, 349; occultations, 280; U.S.S.R., 270
Artificial satellites and spacecraft: A-1, 27; Apollo, 153, 205; boosters, 27; Cosmos, 82, 203; Dial-a-Satellite, 214; Diapason, 204; eclipses, 117; ESSA, 203; Explorer, 347; Gemini, 80, 153, 274, 348; list of, 28; Luna, 27, 131, 276; Molniya, 27; OAO, 275; Pioneer, 152; Proton, 27; Saturn, 204; Venus, 27, 82, 203; zig-zags, 30, 207, 339
Asteroids: Icarus, 95; locating, 122
Clusters: finest, 13; Messier's, 239; globular—M13, 370; M22, 14; M92, 379; open—M6, 13; M11, 15; M35, 60; M44, 248; M50, 119; M93, 183; NGC 2158, 60; NGC 2482, 183
Comets: 25; Ikeya-Seki (1965f), 20, 24, 52, 207, 376
Constellations: Cancer, 248; Canis Major, 64; Canis Minor, 124; Lepus, 124; Lyra, 316, 384
Double and multiple stars: finest, 13; magnitudes, 180; Pulkovo, 79; synchronization, 215; 40 Eridani, 145; HD 128220, 338; Sirius, 4; Σ 2173, 143; Σ 2398, 345
Earth: cloud satellites, 265; life, 213; rainmaking, 214; size, 25
Eclipses: May 30, 1965, solar, 6; December 8, 1965, lunar, 182; May 20, 1966, solar, 17, 155, 282; November 12, 1966, solar, 17
Galaxies: Messier's, 239; M31, 26; M51, 370; M77, 60, 143; M94, 181; NGC 1275, 145; NGC 6207, 378
History: Bacon, R., 218; Croll, J., 150; double stars, 79; Fauth, P., 267; Herschel, W., 95; navigation, 277; Perry, S., 340
Interstellar matter: 90; OH, 132
Jupiter: 306
Mars: 30, 89, 339
Mercury: 143, 213, 375
Meteorites: 144
Meteors: fireball of December 9, 1965, 78; fireball of April 25, 1966, 324; observations of showers, 58, 112, 184, 380
Moon: 10, 30, 131, 137, 147, 312, 327, 339, 377; Beer and Feuillée, 58; Bessarion B, 245; Mersenius, 309; Ptolemaeus, 119
Nebulae: finest, 13; Messier's, 239; M8, 14; M17, 14; M27, 15; M57, 15, 370; NGC 2261, 118; NGC 2440, 183; NGC 4361, 310; NGC 6334, 136; NGC 7009, 16; NGC 7662, 16
Novae: Nova Herculis 1963, 214
Observatories: Allegheny, 145; Alma-Ata, 270; Capri, 256; Harvard, 195; McCormick, 210; McDonald, 259; Purple Mountain, 266
Observatories, amateur: Berlin, Germany, 349; Brooklyn, N. Y., 176; Dallas, Tex., 31; Hurley, N. Y., 44; Mount Peltier, Calif., 138
Personal notes: Bernasconi, G., 350; Brouwer, D., 146; Dryden, H., 26; Gartlein, C., 90; Goldberg, L., 195; Houtermans, F., 214; Mazer, M., 206; McLaughlin, D., 26, 91; McNeely, R., 214; Menzel, D., 195; Shapley, H., 337; Stebbins, J., 268
Planetariums: Montreal, Que., 196; Moscow, U.S.S.R., 270; Toronto, Ont., 90
Quasi-stellar sources: 199, 344
Radar and radio astronomy: amateur, 207; galaxies, 90; Goldstone antenna, 342; OH, 132; *Radio Science*, 214; scintillation, 142; with 140-foot telescope, 7
Saturn: 374
Space astronomy (see also Artificial satellites and spacecraft): infrared, 208; Mars landing, 346; NASA budget, 71; on moon, 3, 207, 339; plans, 255
Stars: *Ap*, 84; catalogue, 337; evolution, 145; faint blue, 345; H-R diagram, 260, 333; magnetic, 84; magnitudes, 308; potassium flare, 264; spectra, 26; twinkling, 345; white dwarf, 145; 2 Andromedae, 264; 10 Lacertae, 337
Sun: color, 213; flare patrol, 265; observing hints, 241; spots, 311; trails, 188; ultraviolet absorption, 208
Supernovae: 209, 344
Telescopes and telescope making: Capri solar, 256; Chinese, 26; figuring, 89; giant binocular, 106; large, 279; Maksutov, 19; Newtonian alignment, 170; pipe-mounted, 304; Schmidt-Cassegrain, 231; 6-inch transit circle, 72; small reflectors, 110; 10-inch, 366; 12½-inch, 300
Uranus: 30, 346
Variable stars: eclipsing, 213; eruptive, 265; in M31, 26; CY Aquarii, 116; RU Camelopardalis, 323, 381; S Canis Minoris, 185; AI Draconis, 314; u Herculis, 247; R Lyncis, 62; λ Pavonis, 307; 83 Ursae Majoris, 122
Venus: 179
Zodiacal light and gegenschein: 144, 380



Illustrated here are the *Color Map of the Northern Sky* (left) and the *Color Map of the Southern Sky,* to $\frac{1}{8}$ scale.

COLOR MAP OF THE NORTHERN SKY. A new edition of an old favorite from Czechoslovakia. This multicolored chart of the heavens presents in striking fashion a multitude of facts about the stars and constellations. It is a north-pole-centered map that covers the heavens down to 42° below the celestial equator. The background of black shows constellation boundaries in blue and star patterns in white lines. Hundreds of deep-sky objects are plotted, variables and doubles indicated. Stars of magnitude 5 and brighter are included, each colored according to its spectral class. Many brighter stars' distances and luminosities are given, and at the bottom the spectral types and deep-sky symbols are keyed by representative photographs. Perfect for display in home study, observatory, or classroom. Overall size 20 by 34½ inches; mailed unfolded in heavy tube. **$2.00**

COLOR MAP OF THE SOUTHERN SKY. Now available for the first time is a south-pole-centered map showing all that region of the heavens ordinarily invisible in mid-northern latitudes, and covering the equatorial zone to 42° north of the celestial equator. Its plan is the same as the *Color Map of the Northern Sky;* overall size is 20 by 34½ inches. Mailed unfolded. **$2.00**

SPECIAL: Both Northern and Southern Color Maps mailed together in one tube . . . **$3.50**

Just Published! **The third title in Macmillan's SKY AND TELESCOPE Library of Astronomy—**

THE ORIGIN OF THE SOLAR SYSTEM, edited by Thornton Page and Lou Williams Page. Subtitled "The Genesis of the Earth and Planets, and Life on Other Worlds," this magnificent volume contains over 75 selections by 39 authors, the cream of the articles on this topic published in SKY AND TELESCOPE and its predecessors, *The Sky* and *The Telescope.* All have been brought up to date by Dr. and Mrs. Page, with connective commentaries. The chapter titles are: 1, Questions of Origin; 2, The Sun, Source of Energy and Control; 3, The Outer Layers of the Sun; 4, Our Earth as a Planet; 5, The Earth's Atmosphere—Viewed from Below and Above; 6, Evidence of the Origin; 7, The Growth of Cosmogony; 8, Life on Other Worlds. Included also are appendixes giving a brief chronology of astronomy through the ages, notes on the contributors, a glossary, and suggestions for further reading. *336 pages. 115 illustrations.* **$7.95**

ALSO AVAILABLE: Wanderers in the Sky—The Motions of Planets and Space Probes, the first volume in the Library of Astronomy. In 338 pages and over 100 illustrations, 43 contributors explain the solar system and space travel. **$7.95**

Neighbors of the Earth—Planets, Comets, and the Debris of Space is the second volume in this series. Some 100 selections (by 38 contributors) with over 130 illustrations bring you a detailed picture of the nearest celestial bodies. **$7.95**

All items sent postpaid. Please enclose your check or money order. Send for *SCANNING THE SKIES,* our new 32-page catalogue of SKY PUBLICATIONS.

Sky and TELESCOPE

INDEX to Volume XXXII

July to December, 1966

Titles

AFCRL Radio Observations of May's Eclipse, *John P. Castelli* and *Ronald M. Straka*, 84
ALPO Meets in Tucson, *L. J. R.*, 266
American Astronomers Report —
Area Scanning, 262
Catalogue of Emission-line Stars, 12
Cosmic X-Ray Sources Observed, 12
Diameter of Antares, 13
Elevation Differences on Mars, 261
Experiments in Infrared Spectroscopy, 12
High-Latitude Hydrogen Clouds, 206
New Image Tubes for Space Astronomy, 207
New Mechanical Designs for Large Telescopes, 208
Radar Studies of Planetary Orbits, 261
Radio Observations of a Solar Flare, 13
Solar Observing with a Broad-Band Filter, 262
Sungrazing Comets, 206
Weighing Micrometeorites, 207
Annular Eclipse of May 20th, 80
Barwell Meteorite, The, *P. Lancaster Brown*, 7
Big Gun on Barbados, *Peter M. Millman*, 64
Blaeuw's Celestial Globe and Three New Stars, *Karel Hujer*, 278
Boston Master Optician Dies, *James G. Baker*, 29
"But Who Needs Sun at Night?" 183
Convention in Miami, *W. E. S.*, 132
Early Reports of the May Eclipse, 14
East and West on the Moon, *J. A.*, 208
Good Leonid Year? A, 251
High-Flying Gemini 11, *Raymond N. Watts, Jr.*, 264
High-Precision 85-foot Radio Telescope, A, *Edward F. McClain*, 4
Identification of the X-Ray Source in Scorpius, The, *Herbert Gursky*, 252
Infrared Stars, *Harold L. Johnson*, 73
Long-Base-Line Interferometer at Jodrell Bank, The, *Albert D. Frost* and *Henry P. Palmer*, 21
Lunar Basins, Lunar Lineaments, and the Moon's Far Side, *William K. Hartmann*, 128
Lunar Orbiter Photographs Earth and Moon, 346
Lunar Orbiter Surveys the Moon, *Raymond N. Watts, Jr.*, 192
Mariner 4 Heard From Again, 3
Mark Smith Planetarium in Georgia, The, *Angus B. Domingos, Jr.*, 142
Maximum Eclipse Effort, A, 135
New Comet Kilston (1966b), 191
New Communications Satellites, *Raymond N. Watts, Jr.*, 350
New Orbiting Geophysical Observatory, *Raymond N. Watts, Jr.*, 86
New Santa Cruz Headquarters for Lick Observatory, *A. E. Whitford*, 328
Night-Sky Phenomena Photographed from Gemini 9, *Edward P. Ney*, 276
1967 Occultation Supplement — Predictions for the United States and Canada, 283
Notes on South American Astronomy, *Thornton L. Page*, 335
Otto Struve Memorial Symposium, *Bart J. Bok*, 68
Palomar 60-inch Photometric Reflector, *Ira S. Bowen* and *Bruce H. Rule*, 184
Periods of RR Lyrae Variable Stars, The, *V. Zessevich*, 199
Pictures from the Moon, *R. N. Watts, Jr.*, 16
Public Observatory in Czechoslovakia, A, *B. Polesny*, 138
Radio Astronomers Detect Cosmic Helium Emission, 123
Radio Astronomy and the Galactic System, *Bart J. Bok*, I, 271; II, 341
Results of Sundial Competition, *Hermann Egger*, 256
R. M. Petrie: Canadian Astrophysicist, *Anne B. Underhill*, 25
Second International Planetarium Executives Conference, *Charles F. Hagar*, 205
Some Photographs by Hans Vehrenberg, 88
Some Results from Space Studies, *Raymond N. Watts, Jr.*, 140
Some Surveyor Findings, 63
Stellar Ultraviolet Spectra from Gemini 10, *Karl G. Henize* and *Lloyd R. Wackerling*, 204
Toward a New Astronomical Imagination, *Robert S. Richardson*, 344
Twin 16-inch Photometric Reflectors at Edinburgh, *V. C. Reddish*, 124
Western Amateurs Convene in California, *Joel W. Goodman*, 188
What Luna 9 Told Us About the Moon, *Yuri N. Lipsky*, 257

Scorpiid Meteors, 113
Some Sunspot Observations, 50
Sunspot Numbers, 52, 110, 170, 239, 316, 386
Telescope Image Reversal, 315
Telescope Sky Pointer, 240
Two New Variables, 384
Unexpected Meteor Shower from Lyra, 237
Unusual Lunar Dome, An, 111
Zeta Herculid Meteors, 49

Planetarium Notes, 148

Questions from the S + T Mailbag, 13, 85, 131, 187 (correction, 260), 260, 349

Rambling Through . . . (current month) Skies, 56, 116, 176, 244, 320, 392

Some Astronomical Anniversaries, December, 1965, correction to, 187

Southern Stars, 58, 178, 322

Stars for . . . (current month), 57, 117, 177, 245, 321, 393

Selected Topics and Celestial Objects

This listing is not intended to be exhaustive, and does not supplant the other parts of the index. For example, material in such regular features as Books and the Sky is ordinarily indexed only under the Departments and Features section.

Amateur astronomers: AAVSO, 348; AL, 132; ALPO, 266; international, 78, 210; *Radio Sky,* 209; Switzerland, 144; WAA, 188
Artificial satellites and spacecraft: communications, 141, 350; Elektron 2, 141; Gemini 9, 20, 276; Gemini 10, 204; Gemini 11, 197, 264; Imp 3, 275; Intelsat (53 nations), 350; Japanese, 265; Lani Bird, 350; Luna 9, 257; Luna 11, 197; Luna 12, 352; Lunar Orbiter 1, 192, 346; Mariner 4, 3; OGO, 86; OSO 2, 91; Pageos, 87; Project Able, 183; SR-4, 141; Surveyor 1, 16, 63; wire-mesh, 141
Aurora: 380
Balloon astronomy: 26
Clusters: in small binoculars, 311; globular—M2, 237; M5, 48; M10, 51; M12, 51; M13, 46, 108; M14, 51; M15, 46; M22, 47; M71, 113; M92, 48; open — Brocchi's, 113; Pleiades, 139; NGC 6802, 113; NGC 6823, 112
Comets: sungrazing, 206; Barbon (1966c), 198; Halley, 71; Ikeya-Everhart (1966d), 263; Kilston (1966b), 191; Neujmin 1 (1966a), 26, 126; Rudnicki (1966e), 334; van Houten (1961 X), 263
Conjunctions: August, 114, 308; Pallas and star, 387
Constellations: Delphinus, 176; Lyra, 56; precessional changes, 244, 320, 392; visibility of southern stars, 78, 210; Vulpecula and neighbors, 116
Cosmic rays: 272
Cosmology: 27
Double and multiple stars: evolution, 275; γ Andromedae, 238; γ Arietis, 238; γ Ceti, 238; β Cygni 238; ϵ Lyrae, 238; Winnecke 4, 83
Earth: atmospheric bulge, 334; cloud satellites, 139, 210; geodesy, 140; life, 126; Operation Harp, 64; "sun at night," 183, 265, 327
Eclipses: May 20, 1966, solar, 14, 80, 84; November 12, 1966, solar, 135; October 29, 1966, penumbral lunar, 383
Galaxies: in Eridanus, 385; tiny, 72; M31, 88, 273, 342; M51, 90; NGC 1300, 385
History: Blaeu(w), W., 278, 327; Chinese, 327; Richer, J., 79; Stonehenge, 32
Mars: surface relief, 261
Meteorites: Barwell, 7; chondrules, 27; micrometeorites, 207, 333
Meteors: Delta Aquarid, 233; Leonid, 251; Orionid, 386; Perseid, 233, 314; Scorpiid, 113; September 17, 1966, fireball, 313; unexpected shower, 237; Zeta Herculid, 49
Milky Way (galaxy): center, 342; deuterium, 275; magnetic field, 341; photographic mosaic, 90; spiral structure, 273
Moon: books, 334; central peaks, 275; current problems, 128; directions on, 208; dome, 111; Encke, 239; Jansen B, 49; Luna 9, 257; Lunar Orbiter 1, 192, 346, 352, 359; maps, 209, 281; phases, 203; photographs, 164, 359; Ptolemaeus, 312; secondary craters, 26; Surveyor 1, 16, 63
Nebulae: Dumbbell, 112; M97, 106; North America, 88; Orion, 341; planetary, 333; Rosette, 89; Veil, 109, 170
Novae and supernovae: historic, 278; Persei 1901, 238; Puppis 1673?, 79
Observatories: Ceske Budejovice, Czechoslovakia, 138; Edinburgh, Scotland, 124; Lick, Calif., 328; LPL, Ariz., 73; Palomar, Calif., 185; Perth, Australia, 349; Smithsonian stations, 85; South American, 335
Observatories, amateur: Cap-de-la-Madeleine, Que., 100; East Hartland, Conn., 300; East Meadow, N. Y., 28; Falkau, W. Germany, 88
Personal notes: Bowie, F., 203; Coghlan, W., 203; Drake, F., 77; Eckert, W., 72; Eggen, O., 137; Frank, P., 143; Hargbol, W., 29; King, H., 332; Lemaitre, G., 275; Oort, J., 333; Payne-Gaposchkin, C., 202; Petrie, R., 25; Sawyer, H., 203; Stone, J., 203; Struve, O., 68; Sykes, G., 203, 349; van Wijk, U., 198; Vening Meinesz, F., 198
Photography: comparators, 373; cooled camera, 106; lunar, 164; Vehrenberg, H., 88
Planetariums: Chapel Hill, N. C., 143; executives conference, 205; Macon, Ga., 142
Quasi-stellar sources: 3C-446, 127
Radar and radio astronomy: cosmic helium, 123; galaxy, 271, 343; hydrogen clouds, 206; long-base-line interferometer, 21; NRL antenna, 4; planetary orbits, 261
Space (see Artificial satellites and spacecraft)
Stars: Barnard's, 169; diameter of Antares, 13; emission-line, 12; fast-moving, 143; infrared, 73; infrared spectra, 12; Mira spectrum, 332; rotation, 334; ultraviolet spectra, 204; unique spectrum, 71
Sun: broad-band filters, 262; flare, 13; July prominence, 171; objects crossing, 27; spots, 50, 344
Sundials: 256
Tektites: 127
Telescopes and telescope making: area scanner, 262; Barlow lenses, 103; Cassegrain-Maksutov, 40; catadioptric, 100; drive, 104; image reversal, 315; image tubes, 207; junior's, 376; low-expansion blanks, 159; mechanical design, 208; mountings, 228, 303; off-axis, 231; portable, 377; rich-field, 102; 16-inch twin photometric, 124; 60-inch Catalina, 73; 60-inch Palomar, 185; 10-inch, 43
Uranus: satellites, 127
Variable stars: eclipsing, 197, 265; in M3, 71; long-period, 198; RR Lyrae type, 199; two new, 384; VZ Aquilae, 201; KO Aquilae, 198; Z Canum Venaticorum, 202; SU Cassiopeiae, 241; γ Cassiopeiae, 174, 265; EK Cephei, 390; RR Geminorum, 201; AG Herculis, 202; SZ Hydrae, 201; RR Lyrae, 200; NW Lyrae, 201; β Lyrae, 54; λ Pavonis, 83; β Persei, 333; S Sagittae, 115; X Trianguli, 318; AI Velorum, 200
Venus: phases, 52
X-ray astronomy: cosmic, 12, 27, 252, 271, 333; solar, 141

Christmas Specials

Year-end Combinations
for November and December only

FINE BOOKS – The first three volumes of the SKY AND TELESCOPE library: **Wanderers in the Sky, Neighbors of the Earth,** and **The Origin of the Solar System.** $23.85 value for **$21.50**

PICTURE PARADE – Our famous large halftone prints for wall display or album, 82 pictures in all. **Sky Sets I** (24), **II** (24), **III** (18), and **Jumbo Sets** (16 double size). $16.00 value for **$13.75**

PLANET PACKAGE — **Mars** and **A Photographic Study of the Brighter Planets.** Two copiously illustrated books by E. C. Slipher. The first volume concentrates on Mars, the second on the red planet and also Mercury, Venus, Jupiter, and Saturn. $18.50, now **$17.00**

COLORFUL WALL MAPS — **Color Maps of Northern and Southern Sky,** and **Color Charts of the Moon.** Imported from Czechoslovakia. $5.50 value, **$4.50**

TELESCOPE COMPANIONS – Famous Skalnate Pleso Observatory publications: Deluxe **Atlas of the Heavens** and **Atlas Catalogue.** **$16.75**

For outdoor use, add the **Atlas Field Edition.** Total $22.50 value, **$20.00**

OBSERVERS' TREASURE – **Atlas Borealis** and **Atlas Eclipticalis** cover 75 percent of the sky to 9th magnitude on large-scale maps, giving spectral classes. A $27.50 value, **$25.00**

To complete the sky, **Atlas Australis** is needed. Total $40.00 value, **$37.00**

All items sent postpaid. Please enclose your check or money order. Send for a free copy of our 32-page catalog describing all SKY PUBLICATIONS.

There's a Sky Publication for everyone on your Christmas list

Two Long-Awaited Items — *Just in time for Christmas!*

THE FINEST DEEP-SKY OBJECTS

by James Mullaney and Wallace McCall, *Allegheny Observatory*

By popular request the original three articles listing 105 of the finest showpieces of the heavens have been reprinted as a 32-page booklet. Many additional photographs have been added to this 6-by-9-inch handbook to make it the best illustrated work of its kind. It is printed on sturdy glossy paper well suited for use at the telescope. Listed are the double and multiple stars, clusters, galaxies, planetaries and nebulae that you will want to show your friends. The three tables giving the positions and other data on the 105 objects have been combined into one handy compilation at the booklet's center.

Order O-7 $1.00

LUNAR QUADRANT MAPS

A set of four large charts of the moon, prepared by the Lunar and Planetary Laboratory at the University of Arizona. These outline maps identify all of the thousands of named and lettered craters on the near side of the moon. Many peaks, rilles, and domes are shown, and the maria are indicated in color. Drawn on a generous scale of almost 40 inches to the lunar diameter, these authoritative charts are unequaled for identifying craters seen through a telescope or on photographs. A perfect gift for anyone interested in the moon! Explanation in English (and French). Shipped rolled in a heavy cardboard tube.

Order M-6 $3.50

OTHER *SKY PUBLICATIONS* BOOKLETS and REPRINTS

SELECTED LIST OF STAR NAMES
By George A. Davis, Jr. ..... Order O-1 **75 cents**

ARIZONA-TONANTZINTLA CATALOGUE ..... Order O-4 **50 cents**

VISUAL OBSERVING OF DOUBLE STARS
By Charles E. Worley ..... Order O-5 **50 cents**

CONSTRUCTION OF A MAKSUTOV TELESCOPE
By Warren I. Fillmore ..... Order T-4 **$1.00**

GLEANINGS BULLETIN C ..... Order T-5 **$1.00**

RELATIVITY AND ITS ASTRONOMICAL IMPLICATIONS
By Philipp Frank ..... Order Z-3 **75 cents**

ASTRONOMY ON STAMPS
By Alphonse P. Mayernik ..... Order Z-4 **50 cents**

SPECIAL: All seven of the booklets above plus "The Finest Deep-Sky Objects" $5.00
